PROFESSIONAL SUMMARY

B.Tech CSE student specializing in MERN stack development with a track record of shipping production-grade applications featuring secure REST APIs, RBAC, real-time communication, and Stripe payment integration. Solved 500+ DSA problems across LeetCode and CodeChef. Seeking SDE internship or entry-level roles in product-focused teams.

EDUCATION

DIT University

B.Tech in Computer Science & Engineering | CGPA: 8.42

Dehradun, Uttarakhand

Aug 2023 – May 2027

Mission Academy School

Class XII, CBSE | 94.6%

Baheri, Uttar Pradesh

2022

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Frontend: React.js, Vite, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, REST APIs, JWT, Socket.IO, Multer

Database & Cloud: MongoDB, Mongoose, Cloudinary

Tools: Git, GitHub, VS Code, Postman, IntelliJ IDEA

INTERNSHIP & TRAINING

Full Stack Web Development Intern

Remote

SmartED Innovations

Aug 2025 – Oct 2025

- Contributed to the development of MERN stack features across multiple Agile sprint cycles in a production codebase.
- Designed and integrated RESTful APIs, improving data exchange between React frontend and Express/MongoDB backend.
- Built reusable React UI components with cross-device responsiveness; maintained code quality using Git workflows and Postman testing.

PROJECTS

Mission Academy CMS | MERN, React.js, Vite, Tailwind CSS, JWT, Cloudinary, Multer | GitHub

2026

- Architected a full-stack School CMS across 11 backend modules, 11 MongoDB models, and 18–22 frontend pages serving 2 distinct admin roles.
- Engineered 55+ REST APIs with JWT authentication and RBAC, organized across 11 route files with 5 reusable middleware functions for auth, validation, and error handling.
- Integrated a Cloudinary-based media pipeline across 6 upload-enabled modules supporting image/PDF uploads, replacements, and automatic cloud storage cleanup.
- Developed 8 public-facing API modules and 60+ React components using MVC architecture with filtering, search, and modular utility layers.

NexaAI | MERN, OpenAI, ImageKit, Stripe, Socket.IO, JWT, Vite | [GitHub](#) | Live

2026

- Built a full-stack AI SaaS app integrating 2 AI services (OpenAI for chat, ImageKit for image generation) and Stripe for credit-based payment processing.
- Architected the backend across 4 controllers, 4 route files, and 3 MongoDB models, including a Transaction model for tracking credit purchases, credit usage, and Stripe webhook events.
- Implemented real-time messaging via Socket.IO, dark mode UI, and a React frontend with 3 core components, 4 pages, and centralized context state.

ACHIEVEMENTS

- Secured **4th Rank nationally** in NextGen PM: National Product Management Championship by BookMyMentor (1000+ participants).
- Achieved **Silver Medal on CodeChef** after solving 250+ DSA problems in Java; solved **450+ problems on LeetCode** (arrays, trees, graphs, DP).
- Participated in Smart India Hackathon (SIH) 2025 and qualified for the college-level selection round with a software solution proposal.
- Completed **Accenture Developer & Technology Job Simulation** on Forage — SDLC, STLC, Agile, algorithmic thinking, and debugging.
- Selected to submit a proposal at **Bhartiya Antariksh Hackathon 2024 (ISRO)** for a space-tech challenge.
